

REPLACEMENT BRAKE PARTS

REDUCE MAINTENANCE COSTS - INCREASE PERFORMANCE

Everyone wants to find ways to decrease operating costs without sacrificing quality or safety, and RAPCO has the solution. RAPCO produces one-piece brake discs forged from steel with no welds, eliminating cracking and rust — and significantly stronger than their two-piece counterparts. All brakes are FAA-PMA approved and guaranteed to meet your demanding brake needs.

- *One piece forged with no welds. 100% machined.*
- *New nickel plating.*
- *Permanent laser etched part number for easy identification and traceability.*
- *New material is 4 times stronger than the old material.*
- *Designed to exceed OEM performance standards & airworthiness requirements.*

RAPCO produces an extensive line of FAA-PMA approved replacement brake parts for general aviation aircraft. The product line includes brake discs, lining, rivets and mounting pins used on Cleveland and McCauley brake assemblies. And, with 86 brake discs, RAPCO manufactures significantly more than any other aftermarket brake company - with carefully designed brake linings to perfectly compliment their discs.
